

## Interconnection Queue for the Dominion Energy South Carolina Transmission System

The Queue Position ID is based upon the receipt date of a customer request. This queue position may be held for a customer until all of the necessary data have been provided. If the customer delays in providing the data, then the queue position may be assigned to the subsequent customer. Therefore, the Queue Position ID may change over time.

After an Interconnection Agreement has been signed, the customer name will be posted. This Interconnection Queue reflects requests submitted within that last seven years. For inverter-based projects, the MW rating equals the sum of the max nameplate rating on the inverters. The queue for State Jurisdictional projects can be located at <https://www.dominionenergy.com/south-carolina/save-energy/renewable-energy-developers>.

Queue Position ID	Request #	Date of Completed Application and Deposit	Net Summer/ Winter (MW)	Location (County, State)	DESC Transmission Line or Substation	Requested In-Service Date	Revised Requested In-Service Date	Requested Interconnection Service	Type Generation/ Fuel Type	Fast Track Status	Feasibility Study Status	System Impact Study Status	Facilities Study Status	Project Status	Customer Name
41	20151028001	11/18/2015	113.40	Orangeburg, SC	Cope - Orangeburg East 230 kV	6/1/2019	9/14/2021	Energy	Solar	NA	NA	Complete	Complete	Withdrawn	Southern Grove Solar
